
NOTES:

1. THRUST BLOCKING SHALL CONFORM TO CITY STD 109.
2. TUNNEL BENEATH EXISTING CURB & GUTTER AND BACKFILL W/ SAND OR SLURRY.
3. ORIENT HYDRANT OUTLETS TO FACE STREET.
4. PROVIDE "BREAKAWAY" BOLTS AT HYDRANT FLANGE.
5. FIRE HYDRANT SHALL BE PAINTED SAFETY ORANGE PER THE CITY'S SPECIFICATIONS FOR WATER SYSTEM MATERIALS.
6. IN SITUATIONS WHERE FIRE HYDRANT RUN IS OVER 20 FEET, THE SIZE OF THE HYDRANT LATERAL, AND VALVE SHALL BE 8–INCHES.

REVISION	DRAWN	APP'D	DATE	CITY OF ORANGE WATER STANDARDS	DATE: OCT. 2007
				STANDARD	STANDARD DRAWING NUMBER
APPROVED: 10/15/07 CITY WATER MANAGER DATE				FIRE HYDRANT ASSEMBLY	OWD-102

NOTES:

1. CONCRETE COLLAR SHALL MEET CURB AT SAME ELEVATION AS TOP OF CURB
2. CONCRETE SHALL BE CLASS 420 – C –2000 CONTAINING NOT LESS THAN FIVE SACKS PER CUBIC YARD.
3. GUARD POSTS SHALL BE INSTALLED PER STANDARD DRAWING 104 WHEN THERE IS NO CURB.

REVISION	DRAWN	APP'D	DATE	CITY OF ORANGE WATER STANDARDS	DATE: OCT. 2007
				STANDARD	STANDARD DRAWING NUMBER
APPROVED: 10/15/07 CITY WATER MANAGER DATE				FIRE HYDRANT CONCRETE COLLAR AND LANDSCAPE AREA INSTALLATION	OWD-103

*IF THE BACKFLOW PREVENTION DEVICE TO BE INSTALLED IS OF THE TYPE KNOWN AS A "VACUUM DEVICE", IT SHALL BE INSTALLED A MINIMUM OF 12" ABOVE THE HIGHEST POINT OF USAGE DOWN–STREAM FROM THE DEVICE.

NOTES

1. BACKFLOW PREVENTION DEVICES WHICH ARE APPROVED FOR INSTALLATION IN THE CITY OF ORANGE ARE THOSE DEVICES APPROVED FOR USE BY THE UNIVERSITY OF SOUTHERN CALIFORNIA FOUNDATION FOR CROSS CONNECTION CONTROL AND HYDRAULIC RESEARCH.
2. DEVICES SHALL BE INSTALLED ABOVE GROUND AND IMMEDIATELY BEHIND AND ON THE CUSTOMER'S SIDE OF THE METER AND SHALL BE READILY ACCESSIBLE FOR TESTING.
3. BACKFLOW PREVENTION DEVICES SHALL BE INSTALLED AT LOCATIONS OTHER THAN IMMEDIATELY BEHIND THE WATER METER WHEN REQUIRED BY LAW, OR WHEN DETERMINED BY THE WATER DEPARTMENT AND HEALTH AGENCY THAT SUCH ADDITIONAL DEVICES ARE NECESSARY TO ADEQUATELY PROTECT THE WATER SUPPLY.
4. ALL BACKFLOW DEVICES SHALL BE CERTIFIED BY A CERTIFIED BACKFLOW DEVICE TESTER AFTER INSTALLATION.

APPROVED: 10/15/07 CITY WATER MANAGER DATE				BACKFLOW PREVENTION	OWD-306

SPECIFICATIONS
FOR
WATER SYSTEM MATERIALS

CITY OF ORANGE WATER DIVISION
189 S. WATER STREET
ORANGE, CA 92866

October 2007

Materials

All water system materials furnished for installation by contractor shall be provided with clear manufacturer's markings and labeling indicating that the product furnished meets the materials standards requirements of the City of Orange. All products shall be new, not previously used, and of current manufacture and supplied to the jobsite in unopened packaging. In addition to the labeling and packaging requirements, and upon the request of the City Inspector, all pipe, pipe fittings, valves, pipe appurtenances, and service materials shall be provided with a written manufacturer's statement indicating conformance with the specified materials and manufacturing requirements.

Hydrants, Burys, Extensions

Hydrants shall be California type wet-barrel East Bay series hydrants, manufactured to meet all applicable requirements of the latest revision of AWWA C-503.

Hydrants shall have one 2 ½" hose outlet and one 4" pumper outlet. Outlet threads shall be American National Standard Hose Threads. Outlet caps shall be cast iron and shall include chains and gaskets.

Valve stems shall be NDZ Bronze. All stems shall have pentagon operating nuts measuring 1 ½" from point to flat. Flange drilling shall be 6-hole. Bolts shall be the break-off type 5/8" x 3" plated hexagon-head machine bolts. Gaskets shall be full flange gaskets, made from 1/8" cloth-inserted rubber sheet.

Interior ferrous surfaces shall be coated with a fusion-bonded epoxy with a dry film thickness of not less than 8 Mils.

Exterior ferrous surfaces shall be painted Safety Orange, using Iron Guard DTM Acrylic Enamel as manufactured by Krylon.

Hydrant bury shall be cast-iron with 6" MJ inlet connection. Interior surfaces shall be coated with a fusion-bonded epoxy with a dry film thickness of not less than 8 Mils.

Hydrant extensions shall be cast iron and fusion epoxy lined, 8 Mils.

The following hydrants are approved for use by the City of Orange:

Clow East Bay Model 5

Service Materials, ¾" – 2"

The following manufacturers and types of service fittings are approved for use by the City of Orange.

¾" Angle Meter Stop, with compression connection and CS thread, Jones J-4201-SG, Ford KV43-332WG, or Mueller H-14258.

1" Angle Meter Stop, with compression connection and CS thread, Jones J-4201-SG, Fored KV43-444WG, or Mueller H14258.

1 ½" Angle Meter Stop, with compression connection and CS thread, Jones J-1975WSG, Ford FV43-666WG, or Mueller H14277

2" Angle Meter Stop, with compression connection and CS thread, Jones J1975WSG, Ford FV43-777WG, or Mueller H14277

¾" Corporation Stop, with compression connection and CS thread, Jones J-3401-SG, Ford F1000G, or Mueller H15008

1" Corporation Stop, with compression connection and CS thread, Jones J-3401-SG, Ford F1000G, or Mueller H25008

2" Corporation Stop, with compression connection and CS thread, Jones J-1937-SG, Ford FB1000G, or Mueller B25008.

2" iBlowoff

2" Curb Stop, Jones J-1900, ford B11-777, or Mueller B-20200

Copper Tubing

All ¾", 1", 1 ½", and 2" service laterals shall be installed using Type K soft copper Polyethylene tubing shall be installed over copper tubing per A.W.W.A "Standard for Polyethylene Encasement for Ductile-Iron Pipe Systems" C-105, latest edition.

Meter Box

Meter Size	Meter Box Size	Concrete Cover Size	Model
5/8"x3/4"	14-3/4"x20"x12"	10"x15-1/4"x1-3/4"	36-S*
1"	15-3/4"x22-3/4"x12"	11-1/4"x18"x1-3/4"	37-S*
1-1/2"	18-1/4"x27-1/2"x12"	13-3/4"x23-1/4"x2"	38-S*
2"	22"x35"x12"	17-1/2"x30-1/2"x2"	66-S*

Water Meter boxes shall be manufactured by Brooks Products, J&R, Inc or approved equal.

Gate Valves, 4" – 12"

Valves shall be cast or ductile iron bodied non-rising stem resilient-seated solid wedge gate valves, manufactured to meet all applicable requirements of the latest revision of AWWA C-509.

Valve stems and stem nuts shall be of NDZ bronze.

Bonnet and seal plate bolts shall be T-316 stainless steel.

Inside and outside ferrous surfaces shall be coated with a fusion-bonded epoxy to a dry film thickness of not less than 8 Mils.

The following makes and models are approved for use by the City of Orange:

Clow RW Valve
Kennedy Ken-Seal Valve
M & H Resilient Wedge Valve
Mueller A-2360 resilient Wedge Valve
U.S. pipe Metroseal Valve
American Flow Control Series 500 AFC Resilient Wedge Valve

Valve Boxes

Valve boxes shall have a concrete body, with an inside diameter of 10 ¼", and cast iron top with triangular cover marked "water", such as the Eisel Enterprises #4TT, Brooks #4-TT, or equivalent.

Valve box riser pipe shall be standard 8" diameter SDR 35 PVC pipe.

Pipeline Materials

Pipe 4" - 12" shall be push-on type single-gasket joint Class 350 Ductile Iron Pipe, with a nominal laying length of 18 feet. Pipe 16" and larger shall be push-on type single-gasket joint Class 250 Ductile Iron Pipe. All pipe shall be manufactured in accordance with ANSI/AWWA C-151. All pipe shall be cement lined per ANSI/AWWA C104.

Pipeline fittings shall be either compact, short-body ductile iron fittings manufactured in accordance with ANSI/AWWA C-153, or full-sized ductile or gray iron fittings manufactured in accordance with ANSI/AWWA C-110. All fittings shall be cement lined per ANSI/AWWA C104. Fittings are to be MJ x MJ or MJ x Flg as indicated on the plans. T-head bolts are to be Corten steel.

All pipe and pipeline fittings shall be wrapped with polyethylene in accordance with ANSI/AWWA C-105. Polyethylene material shall be clear 8 Mil polyethylene flat tubing with dimensions appropriate for the size of pipe installed.
